

- This version of HAB currently is able to run the following applications:
- Card Viewer (described on page 7)
- Card Stat Viewer (described on page 11)
- Army Generator (described on page 13)
- Army Display (described on page 15)
- Unit Battle Report (described on page 16)
- Update Values (described on page 16)
- Copy Database (described on page 16)
- Merge Databases (described on page 16)
- Set Default (described on page 17)
- Reset Win Loss Record (described on page 17)
- Other functionality may be build in later.
- HAB is developed by Benjamin Jones, or Jazack on heroscapers.com. Any inquiries, bugs, or other items about HAB, ought to be brought to Benjamin Jones via either a message through heroscapers.com or an email to flenogo@gmail.com, with “Heroscape Army Builder” in the subject line.
- This software is published and released for free for general use. You may alter the code according to your own desires, however, I ask that if you distribute the changes that you do so for free.
- I hope that you enjoy the program.

- **Changes in this edition:**
- The Army Display has been set to report battles for units as well
- Army generator has increased efficiency
